SKILLS

Programming Languages:	Experienced: TypeScript, JavaScript, Python, Dart Intermediate: Go, Swift, Kotlin
Libraries / Frameworks:	Next.js, Node.js, Nest.js, FastAPI, Flask, Express.js, Flutter, React
Tools / Platforms:	Redis, GraphQL, Grafana, Inngest, AWS, GCP, Amplitude, Docker, GitHub Actions, CI/CD, Stripe, OpenAI, Firebase, Supabase, Langchain
Databases:	PostgreSQL, MongoDB, Firestore, DynamoDB, Pinecone

EXPERIENCE

Creator Club | Full-Stack Developer

Paris, France | May 2025 – Present

- Re-architected core backend APIs with database optimizations, rate limiting, and performance tuning to improve scalability and reliability.
- Implemented production-grade observability using structured logging, metrics, and Grafana dashboards.
- Built analytics pipelines with Amplitude to support data-driven product decisions.
- Optimized creator matching and swipe flows to reduce unnecessary API calls and backend load.
- Designed and shipped creator invites and public share pages with user-controlled settings and analytics.
- Implemented real-time notifications and live updates using FCM and Server-Sent Events (SSE).
- Led escrow-based payment flows using Stripe Connect for paid collaborations.

Realtime Innovations | Full-Stack Developer

Dublin, Ireland | Aug 2023 – Apr 2025

- Designed and implemented microservices using Node.js, FastAPI, and PostgreSQL.
- Built secure collaboration features with encrypted backend services and client-side validation.
- Optimized CDN usage for public assets, reducing load times by 30%.
- Developed native iOS (Swift) and Android (Kotlin) layers for secure home widgets.
- Led migration from monolith to serverless using AWS Lambda and DynamoDB.

Botzie | Full-Stack Developer

Lisbon, Portugal | Jul 2022 – Jul 2023

- Built responsive UI using Flutter and React.js for a crypto tracking platform.
- Integrated Web3 libraries for blockchain transactions and smart contract interactions.
- Developed REST and GraphQL APIs with Nest.js for real-time data.
- Implemented OAuth 2.0 authentication for cross-platform login.

bHive Innovations | Software Engineer Intern

Boston, USA | Mar 2022 – Jun 2022

- Implemented video calling using Agora SDK (Flutter) and WebRTC (Web).
- Converted Figma designs into pixel-perfect React and Flutter interfaces.
- Enhanced security using JWT authentication and AES-256 encryption.
- Built a Python-based recommendation system for personalized content.

MobbyPark | Software Engineer Intern

Bengaluru, India | Sep 2021 – Feb 2022

- Redesigned application UI using Flutter and React.js.
- Improved PostgreSQL query performance by 20%.
- Created custom animations to enhance user experience.

PROJECTS / OPEN-SOURCE

Breeze | GitHub

Local LLM, Vite, CRX.js, Chrome Extension

A local AI-powered Chrome extension that generates SEO and marketing content directly from any webpage, including blog drafts and Reddit-style promotional posts, without relying on external cloud inference.

Fina | GitHub

FastAPI, OpenAI, Pinecone, LangSmith

An AI-driven personal finance analysis tool that processes bank statements, categorizes transactions, and provides insights via an interactive interface. Designed to assess borrower and lender loan eligibility using transaction-level intelligence.

Balncd | [Link](#)*Flutter, Firebase*

Mobile app for Indian SMBs to generate GST invoices and track business expenses.

KeevoSpace | [Link](#)*OpenAI, Node.js, PostgreSQL, React, AWS*

AI-powered link management system using embeddings and conversational search, serving 500+ users with secure JWT-based authentication and cloud deployment.

HONORS & AWARDS

Google Solution Challenge 2022 — World Top 50

Microsoft Imagine Cup — National Champion & World Finalist

IBM Reimagine Hackathon 2021 — Runner-up

EDUCATION

GH Raisonni College of Engineering

Bachelor of Technology in Computer Science Engineering

Jul 2019 – Jul 2023
